

Workshop on challenges and opportunities for water reuse

Too precious to waste?

By 2025, two thirds of the world's population may be facing water shortages. Reuse of non-conventional water resources might be one of the most important ways to increase water availability. BUT what are the major challenges and opportunities? Is it safe? Is the relevant regulatory framework in place?

9th May 2018 (Wednesday) 13:00-17:00

Workshop at the 10th Eastern European YWPs Conference

Register by 1st April 2018, and be present in Zagreb on 9th May 2018. Together we will work out the most important information on reuse and its implications of the practice for the environment, identify knowledge gaps and try to fill them in. The workshop in the form of a *world café* will be **jointly organized by** two groups that gather enthusiastic YWPs working in the water reuse sector - **Blue Circle Society of the NEREUS COST Action 1403** and **IWA YWRP group**.

Registration: <http://iwa-ywp.eu/important-information/>

Information: stevo.lavrnica@unibo.it

Workshop hot topics

- Reuse schemes
- Benefits vs. drawbacks
- Pathogens, contaminants of emerging concern
- Public acceptance
- Relevant guidelines

Key dates

15th February 2018 - Registration opens

1st April 2018 - Registration closes

9th May 2018 - Workshop (13:00-17:00)

Workshop registration

The workshop is free for YWPs who register for the 10th IWA YWP Conference in Zagreb and will be held at the WWTP Zagreb
