

Bentley Systems Inc. announces workshop on WaterCAD technology to be held on 9th May during 10th IWA Eastern European Young Water Professionals Conference (7-12 May 2018, Zagreb, Croatia)

Water is human most valuable resource! How can we use computer software for sustainable water and energy management in water supply systems?

Tap water is one of most underappreciated benefits of modern humans. What lays underneath one easy movement of hand when opening our tap? This 4 hours workshop will show functioning principles of a water supply system simulated inside Bentley WaterCAD software.

Participants will receive introduction to most useful aspects of hydraulic models with an emphasis on best practices of using Bentley WaterCAD.

Target Audience

Young Water Professionals (<35 years) interested in water supply network modelling

- Students and PhD students
- Consultants and designers
- Utility company engineers
- Water boards
- Academics

Registration and participation

This training is free for all participants.

Organizer: Bentley systems, incorporated

Partners: GeoModeling d.o.o. Zagreb; Hidroing d.o.o. Osijek

Presenter: Igor Dundović, univ.spec.ing.aedif.; Hidroing d.o.o. Osijek

For details on registration please visit <http://iwa-ywp.eu/>

If you have further questions about the content of the training, please contact Igor Dundovic at igor.dundovic@hidroing-os.hr
